

Lancaster Farming

VOL. 12 NO. 32

Lancaster Farming, Saturday, July 8, 1967

\$2 Per Year

"C'MON THERE — Let these folks look you over," says livestock extension specialist Dwight Younkin as he parades this market hog class before some 60 participating judges Saturday at the

Lancaster County Swine Producers Association Field Day. Assisting Younkin is James Horton, left center, who hosted the field day at Masonic Homes Farm, Elizabethtown. L. F. Photo

Bollinger Wins Gilt At Lancaster County Swine Producers Field Day

Eugene Bollinger, 16, proved again that he knows his pigs. Saturday when he out-pointed all competition in the youth division swine judging event at the Lancaster County Swine Producers Association Field

Day. He was presented with a purebred Berkshire gilt as his award. Two years ago, at the County Conservation Field Day, he also won a gilt. But then his triumph came in the greased pig contest in which he out-fought that critter and had it hogtied in what may have been a record time of one and a half minutes.

The son of Mr. and Mrs. Paul Bollinger of Denver R2, Bollinger piled up 441 points of a

Delaware Valley Milk Base Plan Recommended

An amendment to the Delaware Valley Milk Order was recommended this week by the U.S. Department of Agriculture. As proposed, the order would be amended to include a base-excess plan identical to that which was suggested by Inter-State Milk Producers Cooperative at the Philadelphia milk hearing session June 12-13.

The amended order would also provide a reciprocal agreement among orders 4, 16, and 3 to the effect that a dairyman could transfer from any one of these to another without being penalized.

According to Inter-State director of public relations Boyd Gartley, there will be no block voting in the referendum to amend the present order; each dairyman's vote will be tallied. Inter-State plans seven area meetings, Gartley noted, to explain the base-excess plan to dairymen. The first of these was held

(Continued on Page 16)

Farm Price Levels Up Slightly For June

Substantial increases in the prices received by farmers for vegetables, meat animals, and dairy products more than offset declines to push the June index of prices received up one point, according to the Pennsylvania Crop Reporting Service. Vegetables, meat animals, and dairy products all registered two percent increases over the previous month.

The increase in the meat animal price index was attributed to the increased prices received for steers and heifers and slaughter cows. The price of steers and heifers at \$24.40 was 60 cents above last month, with the price of slaughter

(Continued on Page 11)

County Barley Quality Sags As Rains Hamper Harvest

The old adage "make hay while the sun shines" also applies to harvesting small grains, but so far this month it has been difficult advice to follow for Lancaster County farmers.

Usually by this time of the month the barley crop is finished up, and a good bit of wheat is moving into storage. Not this year. With combining beginning

the latter part of last week in the southern end, and some brought to dealers and elevators on the Fourth of July in all sections of the county, it is estimated Thursday of this week that 90 percent of the barley crop is still in the field.

QUALITY OFF

Although some of the early barley harvested looked pretty good, the "quality is getting poorer all the time" as harvest continues, one elevator operator notes.

Lodging has been quite widespread in the county's barley fields, and, although combines are able to get most of the downed grain, the continuing moisture on the lodged crop has taken its toll. Moisture tests, 12 to 13 percent before the recent rains, are now running as high as 17.3 percent, according to reports.

Test weights, as a result of the shriveling kernels, seem to be averaging somewhere between 40 and 43 pounds per bushel, compared to some of the

(Continued on Page 7)

July 13, Field Day For State Pork Producers

Pork producers from all over Pennsylvania will gather at Penn State University on Thursday, July 13, for a field day, according to extension livestock specialist Dwight E. Younkin.

Meeting at the university's swine center at 10 a.m., producers will hear Dr. Grant Sherrett discuss the colony houses and slatted porches, and will see the new farrow-to-finish house. A tour of the boar lots will follow.

The rest of the morning will be spent touring and discussing the new meat evaluation center with the center's manager Robert Kimble.

Following lunch, producers will be given a demonstration of carcass measurements made on the evaluation center hogs by John Ziegler and James Watkins Sherrett and Dr. J. L. Goble will also report on some swine research now being conducted.

Eugene Wingert, St. Thomas R1, chairman of the newly-formed Pennsylvania Pork Producers Council, will describe the Council's plans, activities, and programs

Selection Of 4-H County Queens Set For 13th

The annual contest for selection of junior and senior 4-H county queens will be held Thursday, July 13, at 7 p.m., according to county home economist Doris W. Thomas

The contestants will appear in street clothes at the Long Park amphitheater. They are advised to arrive at the park no later than 6:30 p.m. to receive final instructions, Mrs. Thomas noted.

Since early applications for the contest indicated a smaller

County Poultry Association To Host NEPPCO Tour Oct. 9

Directors of the Lancaster County Poultry Association voted unanimously Thursday night to host a tour October 9th in conjunction with the 1967 Northeastern Poultry Producers Council (NEPPCO) Exposition.

The proposal, made to the association by NEPPCO executive director Richard I. Ammon was enthusiastically endorsed by the county board, meeting at the Lancaster Farm Credit Bldg.

With poultry industry people from all over the northeastern U.S. and Canada, attending the annual NEPPCO Exposition October 10-12, Ammon noted that a pre-exposition tour of Lancaster County's famed poultry industry and historical

sights should attract considerable interest.

TENTATIVE SCHEDULE

Directors immediately roughed out a tentative tour schedule to be confirmed and presented in detailed form by the next board meeting August 3.

Planned stops include modern laying hen and broiler operations, an egg processing plant, an historical exhibit, a barbecued chicken lunch, and a family-style Pennsylvania Dutch dinner served at one of Lancaster County's several restaurants noted for such fare. If time permits, directors suggested the tourists might also enjoy seeing how tobacco is handled in sheds on Lancaster County farms.

Advance registration and publicity for the tour will be handled by NEPPCO, with buses leaving Harrisburg at approximately 7 a.m.

(Continued on Page 7)

Temperatures for the next five days are expected to average near the normal mean temperature of 76 degrees. With little day-to-day change expected, daytime highs and overnight low temperatures will range 87 to 65 degrees.

Precipitation, perhaps totaling greater than 1/2-inch, is expected in the form of showers Sunday and Monday.

Farm Calendar

July 10-8 p.m., Lancaster County SWCD directors at Courthouse.

July 11-9:30 a.m., Lampeter-Strasburg 4-H Club at L-S High School.
10 a.m., Agronomy dealer meeting at Fleetwood Grange, Berks County.

July 13-10 a.m., Pa. Pork Producers Field Day at Penn State University.
7 p.m., 4-H County Queen Contest, at Long Park, Lancaster.

MARKET NEWS REPORT

Weekly Poultry Report

**Eastern Pennsylvania
And New Jersey**

WEEKLY SUMMARY

LIVE HENS

Prices of both light and heavy hens held unchanged, however lights continued to trend lower within the range, with the top price paid sparingly and generally only for floor birds. Offerings adequate for a fair demand. In instances, trade advice indicated sharply increased offerings from Pennsylvania area as producers liquidate flocks due to continued discouraging egg prices. Heavies adequate for quiet interest. Prices paid at farms: Light Hens 4-5½, mostly 4½-5c; Heavy Hens 11-12c.

TURKEYS

Trading too limited to report prices.

**NO SALE REPORTED
THIS WEEK DUE TO JULY
4th HOLIDAY.**

**Eastern Shore
Exchange**

WEEKLY SUMMARY

Broiler and fryer lot-average live prices averaged about steady for this three-day-market week at 15.98 cents per lb. Prices paid during the week ranged from a low of 15.0 cents per lb. on Wednesday to 16.4 cents on Thursday.

Sales for the week were off slightly from the preceding week at 956,800 head.

Red Meat Production Up In State And U.S.

Red meat production in Pennsylvania commercial slaughtering establishments totaled 89.9 million pounds for the month of May, according to the Pennsylvania Crop Reporting Service. This was five percent more than the meat production the previous month, and 12 percent above production during May 1966. Beef led the field at 44 million pounds, up five percent from May a year ago. Veal, 3.4 million pounds, down one percent. Pork, 41.5 million

● New Holland

(Continued from Page 2)

totaling 96 cows and two bulls. Fresh Holsteins, 365-475; other breeds, 325-400. Bulls, 225 and 235.

HORSES

July 3, 1967

Receipts totaling 361 head sold steady on hack types, with good horses higher. Riding horses, 135-325; driving, 155-240; killers, including mules, 8-9 cents per lb. Pony mares 45-75; geldings, 35-65.

HOGS

July 3, 1967

Sales of 923 head averaged 75 cents to \$1 higher, recovering most of last week's loss. Retail, 24-25; heavyweights, 22-23-50; wholesale (US 1-3), 23-50-24. No sows listed.

CALVES

July 3, 1967

The trend was steady as 139 head sold Choice and Prime, 35-38 50. Good and Low Choice, 33-34 50. Standard, 30-32 50, Common, 20-28 50.

pounds, up 24 percent, and lamb and mutton, 606,000 pounds, up seven percent. January-May red meat production totaled 438,292,000 pounds, eight percent more than last year's output for the same period.

U.S. 9% INCREASE

Commercial production of red meat in the 48 States during May totaled 28 million pounds. This was nine percent above May 1966, and three percent above the April 1967 total. Commercial meat production includes slaughter in federally inspected and other slaughter plants, but excludes animals slaughtered on farms.

The first amendment of the Bill of Rights provides that "Congress shall make no law abridging the freedom of speech, or of the press"—Sen. Everett Dirksen.

From Where We Stand...

Resnick To The Rescue

Joseph Resnick (D-N.Y.), chairman of the House Agriculture Sub-Committee on Rural Development, is probably best known to farmers for his thankfully-unsuccessful efforts to "rescue" the poultry industry from the throes of independence from government controls.

Well, it's Resnick to the rescue again! This time he wants to rescue the hundreds of thousands of farmer-members from the clutches of the American Farm Bureau Federation (AFBF). According to Resnick, AFBF is nothing but a giant insurance complex, not representing farmers, but using them to build an insurance empire. He calls for a sweeping Congressional investigation, and a probe of AFBF's finances by the Internal Revenue Service.

Resnick has made his damaging charges at public hearings and at a press conference held this week. At the latter, he even went so far as to attack one of his own committee members — George Goodling (R-Pa.) a fruit grower and member of the Pennsylvania Farmers Association, an affiliate of AFBF.

While we don't know what truth, if any, there may be in Resnick's charges, we do know that in Pennsylvania PFA represents farmers, and we do know that the PFA affiliate in the county — Lancaster County Farmers Association — consists of 1030 of the county's finest commercial farm families.

Since making his initial charge late last week, Resnick has soared to new heights of despotic fury. Among other things, he has labeled AFBF president Charles Shuman the "King of all gentlemen farmers whose home is in Chicago". According to an AFBF spokesman, that is grossly untrue. Shuman's office is in Chicago; his home is a producing farm in Cook County, Illinois.

AFBF secretary-treasurer Roger Fleming has denied Resnick's charges one by one, casting doubt as to Resnick's general knowledge of farming, and of AFBF operations in particular.

Although all state Farm Bureau affiliates do not have exactly the same restrictions, PFA limits its non-farmer membership to 10 percent, and non-farmers can hold only non-voting associate memberships. To be a voting member, or an officer, in Farm Bureau, a member must be actively engaged in farming, deriving the majority of his gross income from that pursuit. This definition of a member would certainly tend to refute Resnick's charge that AFBF has more non-farmer than farmer members.

Policy in AFBF is made from the county level upwards, and it is impossi-

ble for anyone at the national staff level to set policy; they can only implement it, the spokesman notes.

Policy proposals by county delegates go to the state level. If accepted there, they are presented for national consideration.

While we may have some minor areas of disagreement from time to time with Farm Bureau at county, state, or national levels, we feel that they largely represent the best interests of the American farmers. We very much like the fact that policy is initiated at the grass roots level. Lancaster County farmers must approve of this organization also since approximately 25 percent of our farm families have made LCFA the state's largest county unit.

We think Joe Resnick may be grinding his personal axe in this matter, and would remind him that that double-bitted blade can bite in both directions.

Milk Base Plan Can Help

As described by a representative of Inter-State Milk Producers Cooperative this week, the base-excess proposal which would amend federal milk order 4 sounds like a good deal for Lancaster County dairymen.

Inter-State recommended such a plan to the USDA at hearings last month, with the suggestion it would help even out the flow of milk and income. It is now up to individual dairymen in order 4 to approve or disapprove the proposed amendment by indicating their preference on a special ballot which they will probably receive from the market administrator's office next week.

Will the measure pass? Boyd Gartley, director of information for Inter-State, believes it will if dairymen realize the advantages such an amendment would give them. The cooperative is holding seven public meetings to be sure dairymen understand the value of this proposal, and vote accordingly.

In addition to reducing milk surpluses by spreading them out over the entire year, Gartley notes the amendment would help dairy income by reducing the amount of milk for which farmers would receive Class II prices. It would also eliminate outside milk being dumped in our market during surplus periods, unless the outsider was willing to take a manufacturing milk price for his product.

We urge county dairymen to support Inter-State's effort in getting USDA to offer this amendment. Vote "yes" on your ballot; help keep the Delaware Valley area the best-paying milk order in the east.

● Pa. Pork

(Continued from Page 1)

event originally slated as one of the field day activities, will not take place. It is reported that none of the counties, or districts in the state will be sponsoring queen candidates because of a general lack of interested applicants. This was to have been the state producers' first effort to choose a queen to represent Pennsylvania's pork industry.

"If any tampering is ever permitted with the American right to inform and be informed, this nation will be in grave danger."—Sen. Everett Dirksen.

22, the President directs the Commission to investigate the impact of imports on domestic farm programs, and to report its findings and recommendations to him. The Commission report, which was made public June 30, recommends quotas under which total imports would have been around 2.8 billion pounds milk equivalent, or about the 1966 level.

NOW IS THE TIME...

By Max Smith

Lancaster County Agent

To Mow Grazing Areas

Good pasture management requires regular clipping of the area every 4 to 6 weeks during the season. This encourages new growth and keeps weeds from maturing. Livestock producers using sudan grass, or one of the sorghum hybrids, for grazing purposes should also clip the old growth after a period of grazing. This will give more uniform growth for the later grazing times.

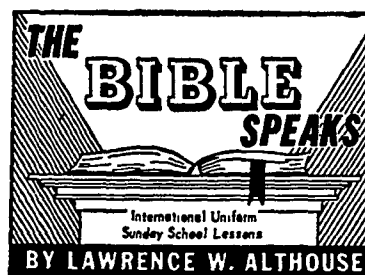

To Observe Before Expanding

Many livestock and dairy farmers will expand their operations if they plan to continue the specialization trend. Good planning is essential to erect the most efficient type of structure with the appropriate equipment. Farmers with expansion

in mind are urged to consult various concerns in the business including our extension engineers to become acquainted with the various alternatives. Also, the inspection of existing operations will be of great help.

To Spread Alfalfa Harvest

One of the most important practices in getting a quality forage crop from alfalfa is to cut it in the bud to early blossom stage; this is difficult with a large acreage of one variety. We suggest that several varieties be included in the acreage so that some will reach cutting time a week or so earlier than the others. For earlier maturing we suggest DuPuits or Saranac and for later cutting Vernal, Cody, or Cayuga.

Success Enough!

Lesson for July 9, 1967

Background Scripture: Acts 14.
Devotional Reading: Psalm 92:1-4.

One day several years ago as I was meditating on the meaning of my ministry, these words came into my mind: You are not called to be successful in your ministry, but faithful. If you are faithful, that will be success enough.

Rev. Althouse wrote down the words and have kept them on my desk ever since. I have kept them near me because, although I know they are true, I still have a hard time remembering this truth from day to day. I need to be constantly reminded, for I am repeatedly setting success — "success" as the world judges it — as the goal for which I am striving. Success as a pastor is "sweet," as it is for any profession, but it is not this to which God has called me. What he wants from me as well as all of us is obedience. If we are obedient, he will take care of the question of success or failure.

Called To "Fail"

This is true for all Christians, not just pastors. Too often we judge our efforts as disciples of Jesus Christ by popular norms: large memberships, impressive Sunday attendances, "live-wire" organizations, etc. There is nothing necessarily wrong with this kind of success, so long as we do not regard it as our primary objective.

As a matter of fact, sometimes when we are obedient to Christ's commands, the world will judge us as failures. Sometimes an obedient congregation will scare people away because they take their mission seriously. The man in the pulpit, instead of attracting the "church-shoppers" with his sermons, may drive them away, not because they are dull and unclear, but because they are disturbing and all too clear! Success, is fine if it doesn't get in the way of being obedient. By the world's standards, even Jesus was, as one song writer has put it, "a flop at thirty-three."

Beyond Statistics

When Paul and Barnabas returned from what is called their "first missionary journey," the congregation at Antioch who had sent them forth awaited a report on this new venture. There were probably people in the congregation who were anxious to know whether it had been a "success" or a "failure." Perhaps there were others who wanted a statistical report: Number of sermons preached? Miles traveled? Converts enrolled? etc.

What were Paul and Barnabas to say? When we speak of the results of Christian witness, how can we judge success or failure? Are we to assume success means to win for Christ everyone whom we meet? Does it mean that the results of our work will always be obvious?

If the answers to the last two questions were "yes," then Paul and Barnabas could not be said to be "successful." Though they had won a fair number of people to Jesus Christ, they were also rejected by many, probably the great majority of people whom they approached. Although they were well-received in some cities they were violently attacked in others. They started Christian congregations at some places, but they were small and were hardly assured of either continuance or success.

The Right Question

No, it was not sufficient to ask them if they had been successful. It was far better for the people of Antioch to ask if they had been obedient. The answer to this question, of course, was "yes." Though their work had been dangerous and discouraging, they had not flinched from rendering their witness. They proclaimed their message and left it to God to determine the results.

Isn't this something we all need to remember: We cannot win everyone to Christ nor can we expect that the fruit of our work will always be apparent. "You are not called to be successful, but faithful. If you are faithful, that will be success enough."

(Based on outlines copyrighted by the Division of Christian Education, National Council of the Churches of Christ in the U. S. A. Released by Community Press Service.)

Dairy Import Restrictions Set

Imports of dairy products will be reduced to one-fourth the present volume beginning July 1, 1967, under a proclamation issued by President Johnson placing import quotas on a number of dairy products or the first time.

Hailing the action as promising "long-sought relief both to dairy farmers and the taxpayer," Secretary of Agriculture Orville L. Freeman pointed out that dairy imports would cut from an annual rate of nearly 4.3 billion pounds milk equivalent currently to about one billion pounds.

Since Jan. 1 through June 7, the Secretary noted, USDA purchases under the dairy rice support program were 108 million pounds of butter, 101.9 million pounds of cheese, and 379 million pounds of dry milk—or the milk equivalent of 5.5 billion pounds—at a cost of \$265.6 million.

Dairy imports have increased sharply from about 900 million pounds milk equivalent in 1965

to 2.8 billion pounds in 1966 and are running at an annual rate of nearly 4.3 billion pounds during the first half of 1967. Most of the increase has been in the form of butter-fat/sugar mixtures used in ice cream manufacture, and Colby cheese, a cheddar-like cheese used mainly in manufacturing processed American Cheese.

The proclamation, issued under the authority of Sec. 22 of the Agriculture Adjustment Act, as amended, will result in an overall annual level of dairy imports of around one billion pounds of milk equivalent, Freeman claimed. This will bring imports to less than one percent of domestic milk production, which currently is running at about 121 billion pounds annually.

Freeman emphasized that the Presidential proclamation will result in a volume of imports substantially below the overall level recommended by the Tariff Commission. Under Sec.

22, the President directs the Commission to investigate the impact of imports on domestic farm programs, and to report its findings and recommendations to him. The Commission report, which was made public June 30, recommends quotas under which total imports would have been around 2.8 billion pounds milk equivalent, or about the 1966 level.

Dairy Groups To Help Develop Sire System

The Holstein-Friesian Association recently became the first dairy cattle breed organization to sign a cooperative agreement with the U.S. Department of Agriculture to unify programs that evaluate breeding stock.

The Holstein group has maintained a breed registry system, including record-keeping, which dates back to 1885. Its records, and those other breed organizations, have supplemented the broader, industrywide record-keeping system of the Dairy

Herd Improvement Association, begun in 1906. DHIA is a cooperative effort of USDA, the federal and state extension services, state cooperatives, and farmers' organizations.

Production records are important. DHIA members have been able to improve their breeding and feeding plans to the extent that they marketed 3,600 more pounds of milk per cow in 1966 than non-member farmers. Furthermore, ARS scientists use DHIA records as the basis for

extensive farm research, such as refined techniques to predict genetic value of breeding stock.

USDA and Holstein officials agree that evaluating and using bulls according to breeding value is necessary for genetic improvement, and that farmers need a single, uniform sire index for production. They also agree that the recently improved USDA system of sire-index calculation is the most useful method available. By using USDA data, breed groups will no

longer have to pay for separate sire indexes.

In addition, production records in USDA's extensive files more than double the information on registered Holstein cows that the Holstein group has at hand. It will be able to expand the overall usefulness of these records and increase its record-keeping efficiency.

According to the cooperative agreement, the Holstein-Friesian Association will use USDA sire summaries and identify them as such. The group also can use DHIA milk production records of Holstein cows, pro-

FDA Clears Amprol For Wider Poultry Use

A recent ruling by the Food and Drug Administration has cleared the way for the coccidiostat "Amprol" to be fed to replacement pullets until the onset of egg production, rather than only for the first 14 weeks of life, as had previously been permitted.

In addition, Amprol now may be used at approved levels to treat outbreaks of coccidiosis in laying hens, according to the drug's manufacturer Merck & Co., Inc. Eggs from flocks so treated may be sold, according to the new ruling.

The company notes that since the new clearance went into effect, feed suppliers have been revamping feed programs to use this increased latitude in working out coccidiosis protection programs for their customers.

vided they are properly identified. The Holstein group will pay the extra cost involved to prepare the magnetic tapes needed for prompt, personalized reports on Holstein cattle to be furnished by ARS.

ARS agrees to furnish the magnetic tapes giving sire indexes and updated production records of Holstein cows three times per year. Similar arrangements are being negotiated with other breed organizations.

In announcing the agreement, both parties stated that farmers will be the greatest beneficiaries because breed records on their cattle will be more uniform, more up-to-date, more broadly based, and as accurate as the latest statistical research can make them.

BRANDON SILOS

To afford the unequaled Brandon 10-year guarantee for today's larger diameter silos, the Brandon Silo Corporation has engineered a new larger and heavier "Sine-Wave" corrugated stave. The new Brandon corrugated stave is the most perfect and durable silo stave that is possible to make.

Lasting beauty incurred in the new "Sine-Wave" corrugated stave by the incorporation of a special blend cement. It is unnecessary to "White-Coat" the silo for appearance. Your new Brandon silo will be distinguished and permanent.

Caution Urged Against Overuse Of Herbicides

The right amount of herbicide will control Canada Thistle, but too much of the chemical may not give good results.

Dr. James Parochetti, extension weed control specialist at the University of Maryland, explains that one pound of 2,4-D per acre sprayed on when the thistle is in the bud stage and again in the early fall will kill the thistle.

But, he cautions, at higher rates, the chemical just "burns off" the tops of the plants so quickly that the herbicide doesn't have time to be translocated (carried to other parts of the plant).

Parochetti recommends at least two consecutive yearly treatments for permanent eradication of the weed.

A single treatment with amitrol will sometimes control Canada thistle, but since amitrol will kill most crops as well, it should be used only for spot treatments or in "waste" areas.

Two, closely-related chemicals are now recommended for Canada Thistle control in peas and alfalfa. In peas, the herbicide is 4-(MCP Butyric), and for alfalfa 4(2,4-DB).

Canada Thistles can be controlled by weekly cultivating says Parochetti, but requires at least one growing season. Clipping will control the spread of Canada Thistle, but any let-up in either clipping or cultivating will result in a new seed crop and reinfestation.

Another trouble with feminine opinion is that it is expressed in too many words.

Good milk profits from your dairy cows start with good feeding. Good feeding starts when you place Red Rose Dairy Feeds in your feed troughs.

These high quality feeds are vitamin-fortified and palatable — to maintain herds and encourage high milk production. Formulated for raising your herd from calf to cow, Red Rose Dairy Feeds are available in many protein levels. Simply choose the one best suited to your particular need according to the roughage you have available on your farm — and feed with a satisfaction you have never known before!

Red Rose 14 Test-Cow Feed is a feed you will find excellent to use. This course granular textured feed is ideal as an all-purpose feed. You can use it as it comes from the bag for feeding to milking cows, dry cows, calves and bulls. It can be fed at all seasons, but is especially helpful to keep appetites from lagging during warm summer days.

Place Red Rose 14 Test Cow Feed — or other Red Rose Dairy Feeds — in your dairy barn soon, and help your cows climb the ladder to better milk profits.

● Poultry To Host

(Continued from Page 1)
proximately 8 a.m. on Monday, October 9th, and returning to Harrisburg that evening. The county poultry association will handle all other tour details, it was noted, and will guide the visiting poultrymen around the county.

OTHER BUSINESS

In other business at the board meeting, directors approved several preliminary designs for association insignia, submitted by director Aaron J. Brubaker. The official insignia will be used on letterheads and for such other promotional purposes as bumper stickers and display signs.

John Jacob Oberholtzer, tour committee chairman, announced the association's annual tour will be held on Tuesday, August 1st. He noted the proposed stops will include the Hershey Chocolate Company, the Grimes Poultry Processing plant at Fredericksburg, and Witmoyer Laboratories at My-

erstown. Final details on this tour will be forthcoming next week, Oberholtzer said.

● Barley Crop

(Continued from Page 1)

excellent barley harvested earlier in the Eastern Shore area which averaged about 47 pounds per bushel.

While yields in some sections of the county are reported good in terms of bushels — 70 to 80 bushels per acre — the lower test weights will pull down total crop weights, it is estimated.

Prices paid by dealers and elevators seem to be holding firm with last year, averaging between 90 cents and \$1. As one operator observed, most farmers feed their barley crop instead of selling it, so not too many prices are figured in that average.

WHEAT

One elevator operator noted that he has seen few years when there hasn't been some wheat moving by the 4th of July, but this year the barley crop barely got started by that date.

However, it is anticipated that if the weather dries up somewhat next week some wheat

will be ready to combine. This will make 1967 one of the few recent crop years in which the wheat and barley harvests have overlapped substantially.

RAINFALL

As measured at the Lancaster station, rainfall since April 1st to date is nearly three inches below normal, but appears to be recovering. The county lagged more than four inches behind normal only ten days ago, and was the most rain-deficient area in the state. It now ranks second, behind Blairsville area which is off by 3.2 inches from normal.

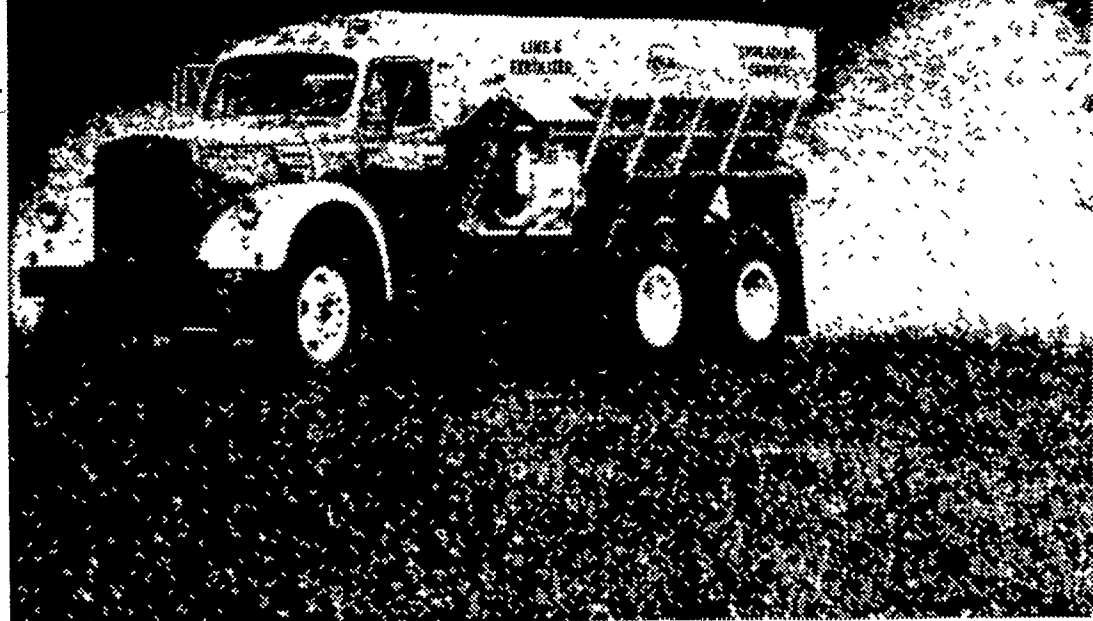

SUMMER HEAT HARD ON FARM EQUIPMENT

Although winter weather may be most damaging, summer sun and heat also shortens the life of farm equipment, say extension agricultural engineers at Penn State University. It pays to keep that expensive equipment under cover when not in use.

AGWAY

THIS IS A TRUCKLOAD OF EXTRA PROFITS

For every ton of lime a dairyman applies, he gets back an extra ton of milk during his rotation. With lime worth ten dollars a ton, and milk figured at eighty, that's a nice return.

Every crop you plant can benefit from correct applications of lime. Your fertilizer will work better. Soil organisms thrive. Organic matter releases nutrients more rapidly. Soil structure is improved. More trace elements become available.

And now is the time to spread lime. Equipment is ready to work for you. The land is firm and dry. Whether you plow this fall or next spring, the lime will be there, ready for plowing down to the root zone. Call your Agway store or representative and ask for immediate spreader service. But do it now.

MOIST LIME

"The lime you can't afford to miss"

Why spend money to lime your neighbors fields when you can use moist lime and keep it where you want it.

Rearing Poultry On Wire Floors May Reduce Infections, Vet Says

The need for parasite-controlling anthelmintics and coccidiostats could vanish if the poultry industry switched from floor rearing to wire-floor rearing of birds, says Dr. P. P. Levine, professor of avian diseases, at the New York State Veterinary College, Ithaca, N.Y. Dr. Levine reviewed avian disease research at the recent Pfizer Research Conference.

He said the trend to cages for hens has noticeably reduced incidence and severity of worm infections. Levine reviewed one study in which hens raised in cages and wire-floor reared broilers had fewest worms, compared to birds raised on the floor. He also pointed out that bacterial infections are spread by fecal contamination, and some leukosis outbreaks could possibly be caused by a beetle which picks up the virus from infected litter.

"There is little doubt that as time goes on, the infectious agents that produce relatively prompt and acute disease will decline in importance and number," Levine predicts. "Advances in knowledge about viral and larger disease organisms are occurring rapidly, and control measures are being developed quickly."

But, he adds, the increasing use of chemotherapeutic agents and synthesized feed components, use of pesticides and anthelmintics, and raising birds in "man-made" environments are creating greater need for knowledge in the field of intoxications. "FDA regulations governing drugs and feed ad-

ditives make this knowledge mandatory," says Levine.

Naturally occurring intoxications are coming in for closer scrutiny, too. Levine said the edema disease that struck the broiler industry several years ago is still being studied. The edema factor is extremely toxic in very small quantities, especially to younger birds.

The United States poultry industry has only recently encountered the so-called "ground nut poisoning" first reported in turkey poult in England. Laboratory work there revealed the cause to be an aflatoxin produced by fungus growth on peanuts.

Egg Purchase Program Set

First offers in a dried whole egg solids purchase program announced by the U.S. Department of Agriculture June 16 will be due by 2 p.m., July 10, and weekly thereafter until further notice, USDA said this week. Initial offers totaling 300,000 pounds are requested.

Offers must be in carlot quantities of 27,000 pounds net weight. The dried whole egg solids must be pasteurized and gas-packed in three-pound (No. 10) cans at establishments operating under the supervision of Consumer and Marketing Service. The dried whole eggs must be processed after the date of current production which meet the U.S. Procurement Grade I quality require-

Nan Schreiber

Nan Schreiber, Summer Extension Assistant

Nan Schreiber has been named summer assistant extension home economist in Lancaster County. Her appointment was effective June 19th. The daughter of Mr. and Mrs. V. Lester Schreiber, New Holland, she is a senior, majoring in home economics, at Hood College, Frederick, Maryland.

Miss Schreiber is a member of the college chapter of the American Home Economics Club at Hood, a member of the college choir and chairman of the yearbook staff. She was an active 4-H club member for six years in Lancaster County.

She will be associated with Mrs. Doris W. Thomas, Home Economist, and M. M. Smith, Victor Plastow, Arnold G. Lueck, County Agents.

Acceptance of the initial offers will be announced by midnight, Thursday, July 13.

C&MS said the dried whole eggs will be bought as a surplus removal activity with funds authorized by Sec. 32 of Public Law 74-320 and distributed to school lunch programs. The dried whole eggs must be processed after the date that a contract is signed, but not later than the third Saturday after that date. The first shipments will be due during the period of Aug. 1 to Aug. 15, inclusive.

Bollinger Wins

(Continued from Page 1)

possible 500 in the event held this year at the Masonic Homes Farm, Elizabethtown. He is a member of the Cloister FFA Chapter at Ephrata High School.

A crowd numbering about 60 participated in the judging competition, which was divided into three divisions—men's, ladies', and youth.

Winners in the men's division were: Richard Boyd, York County, 476; William Fisher, East Earl R1, 463.5; John Henkel, Strasburg R1, 462.5; Mark Nestleroth, Manheim R3, 454.5; John Burkholder, Lititz R3, 441.5; and Leon Arnold, Lebanon, 440.5.

In the ladies' division, it was Carol Henkel, Strasburg R1, finishing first with 436.5 points. She was followed by: Mary Martin, Christiana R1, 412.5; Mrs. Earl Fisher, East Earl R1, 375; Mrs. Hazel Nestleroth, Manheim R3, 369.5; Romaine Huber, 362.5; and Ethel Bollinger, Denver R2, 349 points.

In addition to Bollinger, other placings in the youth division went to: Larry Arnold, Lebanon, 436.5; Susanne Martin, Christiana R1, 423; Beth Boyd, York County, 405.5; ago during a peri-glacial period.

Frank Arnold, Lebanon, 404.6; and Glenn Sauder, Manheim R3, 404.5.

In the judging events, five classes of market hogs, consisting of four animals per class, were rated. Dwight Yountkin, Penn State extension livestock specialist, served as official judge and explained his choices to the audience following the judging of each class. He was assisted by Masonic Homes Farm Swine herdsman James Horton, who was assisted by Masonic Homes Farm swine herdsman James Horton, who hosted the affair.

After lunch, Horton conducted a tour of the farm's swine facilities. At present, he noted, a herd of about 80 sows is being maintained, but that number is somewhat higher than the average of about 50 head usually kept.

Long famed for its Duroc strain of hogs, the Masonic herd is now basically York-Duroc crossbred, with "a little Hampshire thrown in," Horton explained.

DID YOU KNOW—The Boulder Field at Hickory Run State Park apparently was created about 25 to 35 thousand years ago during a peri-glacial period.

Get the BIG silo unloader value!

VanDale

Delivers more silage faster!

Double auger system digs the silage faster and more evenly under all conditions whether silage is frozen, wet, or dry.

Exclusive, adjustable drive hub gives more positive traction, keeps the machine operating evenly, and requires less power.

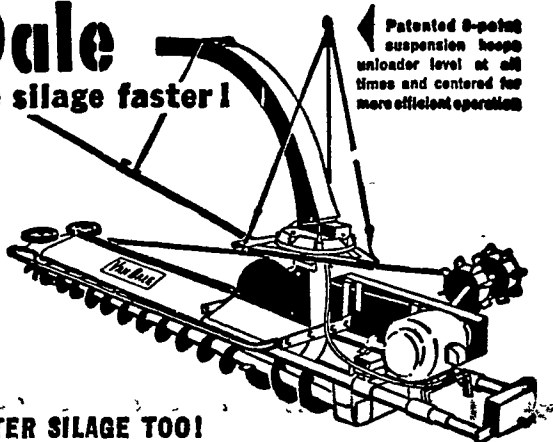

DELIVERS BETTER SILAGE TOO!

The double augers, operating in conjunction with the patented V-paddle impellers, dig the silage, mix it thoroughly, and then throw it down the chute. Your cows and cattle get good, palatable silage... not a powdered mash as often happens with unloaders using blowers.

Best Balance Of Agri. and Forest Lands Sought

Contrary to popular belief, completely forested watersheds may not provide the best protection against Spring floods, visitors to the Watershed areas of the Stone Valley Experimental Forest of Penn State University heard recently.

The statement was made during a tour held in connection with the 60th anniversary celebration of the School of Forest Resources at Penn State. William E. Sopper, associate professor of watershed management, said streamflow from forested lands runs off more rapidly in the Spring than streamflow from agricultural lands.

Dr. Sopper and Dr. Howard W. Lull, adjunct professor of forestry, U.S. Forest Service, showed clear-cut areas where they are experimenting to find the best combinations of forest and non-forest land to control annual Winter-Spring runoff and create a more uniform streamflow.

These forestry scientists said the Winter-Spring runoff in forested areas starts later and moves more rapidly than runoff in non-forested areas. On the average, the streamflow in forested areas takes 86 days to produce one-half the yearly flow while the runoff in non-

Governor To Participate In Info. Center Opening

When the new Lancaster Information Center is officially opened on Friday, July 21, Governor Raymond P. Shafer will be on hand to participate in the ribbon cutting ceremonies at 9:30 a.m.

To be operated by the Pennsylvania Dutch Tourist Bureau of the Lancaster Chamber of Commerce, the visitors Information Center will be conveniently located for tourists visiting the county at the intersection of Hempstead Road and the Route 30 bypass.

forested areas requires 102 days to yield one-half the yearly flow. Their statements were based on eight years of research in the experimental watersheds at Stone Valley and 17 years of streamflow analysis from watersheds throughout Pennsylvania.

Snow is held under forest cover longer than on non-forested lands, they pointed out. The longer the snow remains, the higher the probability of rain falling on the snow, accompanied by warmer temperatures. This combination causes a rapid release of snow, they explained.

Beginning date of the highly concentrated flow period is about January 24 for non-forested areas and about February 12, or three weeks later, for the forested watersheds.

Mary A. Rosenberger

Asst. Home Economist On County Ext. Staff

Mary A. Rosenberger has been named assistant home economist in Lancaster County. Her appointment became effective July 1, announces Thomas H. Patton, director of the state's Cooperative Extension Service. She replaces Mrs. Joanne Bowman, who resigned recently.

Daughter of Mr. and Mrs. William J. Rosenberger, Pottsville, she was graduated in June from Saint Joseph College, Emmitsburg, Maryland, with a bachelor of science degree in home economics. While in college she was a member of the Home Economics Club, yearbook staff, cheerleading squad, and Kappa Omicron Phi, national honorary home economics society.

During the past few summers, Miss Rosenberger has been employed as a student dietitian, lifeguard, and water safety instructor.

In Lancaster County, Miss Rosenberger will be associated with Mrs. Doris W. Thomas, home economist, and M. M. Smith, Victor Plastow, and Arnold G. Lueck, county agents. Their offices are in the Post Office Building, Lancaster.

State IFYE Alumni Plan Conference Here

The International Farm Youth Exchange (IFYE) alumni association will hold its annual conference in Lancaster County July 14-16, it was announced this week.

July 14, at 8 p.m., the IFYE's will gather at Zoll's Meadow, Friday evening session at Zoll's off the N. Groffdale Rd., near Meadow, and the Saturday night New Holland, for a program covered dish supper. Any host which will be conducted by the 4-H county council.

On Saturday, beginning at 9:30 a.m., IFYE's will hold table service.

their formal conference at the Meadow Hills Dining Room. New Danville Pike.

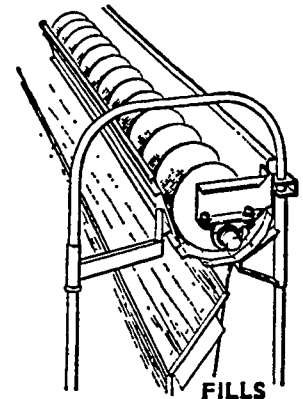

That evening, at 6:30, a covered dish supper and program will be held in the Lampeter Community Park.

All host families — families who have had IFYE's from foreign countries staying with them—are invited to attend the Friday evening session at Zoll's Meadow, and the Saturday night covered dish supper. Any host families attending the supper, however, are asked to bring a covered dish and their own

COOKIE TREATS

It's time to replenish that cookie jar again—

SOFT TREASURE COOKIES

- 1/2 cup shortening
- 1/2 cup sugar
- 1/2 cup molasses
- 1 egg
- 2 1/4 cups sifted all-purpose flour
- 1 teaspoon ginger
- 1 teaspoon cinnamon
- 1/4 teaspoon salt
- 2 teaspoons baking soda
- 1/2 cup milk
- 1 1/2 teaspoons vinegar

Cream together shortening, sugar, molasses, and egg. Sift together flour, ginger, cinnamon, salt, and soda. Combine milk and vinegar. Add flour mixture alternately with milk mixture. Drop by heaping tablespoonfuls on greased baking sheets. Bake in 400 degree oven 8 to 10 minutes. To store,

place cooled cookies in tightly covered container. Makes about 30 cookies.

SAIL AWAY COOKIES

- 1/2 cup shortening
- 1/2 cup sugar
- 1/2 cup molasses
- 1 egg
- 2 cups sifted all-purpose flour
- 2 teaspoons baking powder
- 1/2 teaspoon salt
- 1/2 teaspoon baking soda
- 1/2 cup milk
- 1 cup flaked coconut
- 1/2 cup chopped nuts
- 1/2 cup raisins

Cream together shortening and sugar until light and fluffy. Blend in molasses and egg. Sift in flour, baking powder, salt and baking soda; mix well. Blend in milk. Stir in remaining ingredients. Drop by level tablespoonfuls on ungreased

baking sheets. Bake in 375 degree oven 10 minutes. Makes 4 to 5 dozen cookies.

BROWNIE DROP COOKIES

- 1 cup (2 sticks) butter
- 1 1/4 cups sugar
- 1 cup cottage cheese
- 2 eggs
- 1 teaspoon vanilla
- 2 1/2 cups sifted regular all-purpose flour
- 1/2 cup cocoa
- 1 teaspoon baking soda
- 1 teaspoon baking powder
- 1/2 teaspoon salt
- 1/2 cup chopped pecans

FROSTING:

- 2 1/2 cups confectioners sugar
- 1/4 cup butter, softened
- 1/4 cup light cream
- 1 teaspoon vanilla

In a large mixing bowl cream butter; gradually add sugar and beat until light and fluffy. Add cottage cheese and beat thoroughly. Add eggs, one at a time, beating well after each addition. Blend in vanilla. Sift together flour, cocoa, baking soda, baking powder and salt; gradually add to creamed mixture. Add pecans. Drop by rounded teaspoons onto buttered baking sheet; bake in a preheated 350 degree oven 12-14 minutes. Remove to wire racks to cool. When completely cooled, frost. Makes 8 dozen. To prepare Frosting: In a small mixing bowl combine sugar, butter, cream and vanilla; beat until smooth.

CRISP MOLASSES COOKIES

- 3 cups sifted all-purpose flour
- 1/2 cup sugar
- 1 teaspoon salt
- 1 teaspoon baking soda
- 2 teaspoons ginger
- 2 teaspoons cinnamon
- 3/4 cup shortening
- 1 1/2 cups molasses

1 tablespoon vinegar
Sift flour, sugar, salt, soda, and spices into a mixing bowl. Cut in shortening with pastry blender or two knives to resemble coarse meal. Heat molasses to boiling point; add vinegar and gradually stir into flour-shortening mixture. Drop dough, 1/2 teaspoonful at a time, onto greased baking sheets. Flatten to 1/16-inch thick by stamping with glass covered with a damp cloth. Bake in 400 degree oven 6 to 7 minutes, or until edges have lightly browned. Makes about 6 dozen cookies.

CHOCO-SCOTCH BARS

- 3/4 cup butter or margarine
- 6-10 ounces regular marshmallows (about 40) or 4 cups miniature marshmallows
- 1/4 cup peanut butter
- 1 6-oz. pkg. rice krispies
- 1 cup (6 oz.) semi-sweet chocolate morsels
- 1 cup (6 oz.) butterscotch morsels

Melt butter in 3-quart saucepan. Add marshmallows and cook over low heat, stirring constantly, until marshmallows are melted and mixture is syrupy. Remove from heat; stir in peanut butter. Add rice krispies and stir until well coated. Press warm mixture evenly and firmly into buttered 13x9-inch pan.

Melt chocolate and butterscotch morsels together in saucepan over low heat, stirring constantly. Remove from heat; spread evenly over rice krispies mixture. Cool until firm. Cut into bars.

COCOA KRISPIES JUMBLES

- 1 1/4 cups sifted regular all-purpose flour
- 1/2 teaspoon baking soda
- 1/4 teaspoon salt

- 1/2 cup soft butter or margarine
- 1 cup sugar
- 1 egg
- 1 teaspoon vanilla flavoring
- 2 cups cocoa-flavored rice krispies

Sift together flour, soda and salt. Beat together butter and sugar until creamy. Add egg and vanilla; beat well. Stir in cocoa-flavored rice krispies. Drop by tablespoonfuls onto greased baking sheets. Bake in moderate oven (350 degrees) about 12 minutes. Makes about 3 1/2 dozen cookies.

COCOA PEANUT LOGS

- 1 cup (6 oz.) semi-sweet chocolate morsels
- 1/2 cup peanut butter
- 4 cups cocoa-flavored rice krispies

Melt chocolate with peanut butter in heavy medium-sized saucepan over low heat, stirring constantly until well-blended. Remove from heat. Add cocoa-flavored rice krispies, stirring until coated with chocolate mixture. Press mixture firmly and evenly into lightly buttered 9x9-inch pan. Refrigerate until firm. Cut into bars.

Farm Prices

(Continued from Page 1)
cows at \$18.80 per cwt., up 80 cents from the May 1967 average. The prices for the remainder of the meat animals declined from last month. Milk price surged 20 cents ahead of last month to \$5.55 per cwt., while milk cow prices declined by \$5.00 per head to \$325.00.

GRAINS LOWER

Grain prices were mostly lower, with soybeans the only grain showing a price increase from last month. Corn was

steady with wheat, oats, barley, and rye all declining. Fruit prices were steady, with vegetables showing an increase.

The index of poultry and egg prices dropped six percent as a result of a three cent drop in egg price. Prices received for broilers, farm chickens, and turkeys all remained steady.

The prices received index for all farm products, a measure of the change in prices received by farmers, was 253 percent of its 1910-14=100 percent base. This compares with 252 last month and 245 last year.

The Index of Prices Received by Farmers in the U.S. advanced three points (one percent) during the month ended June 15 to 255 percent of its 1910-14 average. Higher prices for cattle and lettuce contributed most to the increase. Partially offsetting were price declines for hogs, wheat, and eggs. The index was three percent below June 1966.

The Index of Prices Paid for Commodities and Services, in-

FARM WOMEN NO. 26 VOTES F & H DONATION

At its June 29th meeting at the home of Mrs. David Landis, Lititz R2, members of Farm Women Society Group No. 26 voted a \$25 contribution to the Lancaster County Farm and Home Foundation.

In other business, it was announced that tickets were on sale for the Farm Women convention, and also for the appearance of Baroness Maria Von Trapp on November 4th.

In addition the Group assembled 100 favors consisting of wash cloth and bar of soap made in candle shape. These will be distributed to the Orville Mennonite Home.

The next meeting will be the annual picnic at Sico Park on July 23rd.

cluding Interest, Taxes, and Farm Wage Rates increased one point during the month to 343, a record high. The index was 10 points (three percent) above a year earlier.

For the Farm Wife and Family

Ladies, Have You Heard? . . .

By Doris Thomas, Extension Home Economist

Leftover Vegetables Lose Nutrients

Cook vegetables as you need them and serve promptly for full nutrient value.

Vegetables lose nutrients, especially vitamin C, when held and reheated.

Clothing Care Tips

Cut down on trouser pressing bills. Hang pants by their cuffs on clambangers.

Suit jackets keep their shape better if you hang them on shaped hangers.

Using underarm shields in your dresses and suits protects the garments. And they're easier to replace than body and sleeve linings.

Meat Packaged In New Wrap

Boneless roasts are being packaged in plastic netting for cooking. Homemakers like

the net because the roasts hold their shapes while they slice them.

Retailers save time and labor using the net instead of string.

The net is made of sturdy plastic made to withstand oven heat.

How To Select A Cantaloup

You can judge a cantaloup by its aroma and the way it looks.

The sound and feel of a melon isn't an accurate test of quality if many shoppers have felt and tapped the cantaloup before you.

Seeds may rattle because so many other people have shaken the cantaloup.

Quality cantaloups have coarse, corky, and well-defined netting. The color under the netting should be turning green to yellow.

You should find a slightly sunken, smooth, well-calloused scar at the stem end.

If a cantaloup smells good to you, it should taste good.

Some Carpet Buying Guides

Rugs and carpets are available in natural and man-made fibers in different price ranges and styles.

Buy the best rug or carpet you can that meets your needs for the money you have to spend.

No single fiber, pattern, or

construction method is best suited for all purposes.

The best guarantee is a reliable manufacturer's label on the product that a reputable dealer handles.

A good guide to quality is the density and depth of the pile.

You usually get what you pay for in a rug or carpet.

A bargain means shopping for a particular brand or style to see if the price has been reduced.

Proper installation with an underlay can increase the life of a rug or carpet up to 50 percent if it gets the proper care.

KEEP GARDENS CLEAN

During hot weather, blossoms mature daily on many flowers. Removing dead blossoms helps to continue bloom and may prevent disease from starting, says J. Robert Nuss, extension ornamental horticulturist. Plants are healthier and produce more blooms if well spaced. By removing weak plants and broken stems the vigorous plants will have a better chance to bloom.

What will parents of the next generation tell their kids they had to do without? ?

Meet Uni-System...

THE BIG CAPACITY COMBINE THAT'S BUILT TO TAKE EAR CORN PUNISHMENT IN STRIDE

We call it a "corn country" combine because we built it, right from the start, tough enough to bull through the biggest yields and the biggest fields without a bit of strain. Rugged — from grain platform or cornhead to its self-unloading grain tank (70 bu. with extension). Switch from cornhead to grain platform in 30 minutes. Switch from Uni-Combine to picker, sheller or forage harvester in an hour.

- One of the heaviest cylinders in the business.
- Excellent "flywheel" action.
- Choice of 11 or 13-foot platform.
- Choice of cornheads: 2-row wide, 3-row regular or narrow.
- Big capacity strawwalkers, grain pan, cleaning shoe.
- Choice of interchangeable Power Units.

Uni Interchangeability brings self-propelled harvesting within reach of 2' crop farmers. 3 models this year including new 401 cu. in. diesel. Uni-Harvesting units are built in 2 sections for convenient mounting or removal on front axle of Power Unit. Get the whole money-saving Uni story soon. Excellent financing.

Two important things when borrowing money

You need a sharp pencil plus the specialized financial advice of Farm Credit to determine how your financial needs can best be served. Farm production must be maintained, even increased if possible. Providing the financing to insure this is Farm Credit's job. Farm Credit loans are available now for any sound farm need. And, at realistic rates. Farm Credit interest is based on the unpaid balance of the loan. That saves you money.

4-H NEWS

I-G CLUB CHOOSES QUEEN CANDIDATES

by Joyce Stoltzfus, reporter

Members of the Intercourse Gap Sewing & Cooking 4-H Club met June 25th at Pequea Valley High School and elected junior and senior queens to represent the club in county competition.

Chosen were Sandy Fryer, junior queen, and Donna Glick, senior queen contestant.

It was announced that Lucinda Brackbill, president, would not be able to preside for the next few months since she will be attending music camp—an award she won for writing a musical composition. Donna Glick was named to serve as the club's county council representative in place of president Brackbill.

In other business, Mrs. Hoober reminded the members of the Leaders' Council light bulb

sale to be held during the month of July. Members also heard from Donna Denlinger and Evelyn Huyatt on the recent 4-H Club Congress held at Penn State University.

L-M STITCHERS MEET

by Wendy Fritz, reporter

At a June 27th meeting at Warwick High School, the Lititz-Manheim 4-H Sewing Club planned its activities for the 4-H Day Camp.

With president Janis Keeney presiding, members learned that the camp would be open for 4-H'ers aged nine through 13, from July 10-13. Members worked on their garments following the business meeting.

The next meeting will be held July 18 at the High School at 9 a.m. Mrs. Henry Kettering will be the instructor.

P.M. CLUB HEARS OF HAWAII; ELECTS QUEENS

by Linda Porter, reporter

The regular meeting of the Penn Manor 4-H Club was held June 27 at the Ann LeTort School.

Before the business meeting

the club divided into two teams and played baseball. The meeting started at 8 p.m., and for roll call the members gave a brief summary of the progress of their projects. Junior and senior queen candidates were selected. They are: junior queen, Patsy Funk; Linda Porter, senior candidate.

Members were then entertained by Wallace Bork who showed slides and told the club of his experiences in Hawaii. He said "ALOHA" and we were informed that the next meeting will be on July 25, at the Ann LeTort Elementary School.

BROKEN BIT CLUB PLANS FOR COUNTY HORSE SHOW

by Debra Gregory, reporter

Meeting recently at the home of Charles Risser, Stevens R1, members of the Broken Bit 4-H Horse and Pony Club set the date for club eliminations for the grooming and showmanship classes for the County 4-H

Horse Show which will be held at John Glick's ring July 29. The eliminations will be held at Risser's at 7:30 p.m., July 9th.

The club's county council representative related details on the Light Bulb Sale, and on the Massachusetts and Illinois Exchange Trips.

A demonstration "A Horse At Halter" was presented by Charles Risser.

The next meeting will be at the home of Jerry Nessinger, Reinholds, July 14 at 7:30 p.m.

DRUMORE SEWING CLUB ELECTS 4-H QUEENS

by June Aaron, reporter

At a recent meeting, members of the Drumore 4-H Sewing Club elected junior queen Linda Martin, and senior queen, Shirley Aaron to represent the club in the county queen competition.

In the final queen competition the top five girls in each category will compete at Long Park, Lancaster, July 13th.

U. of Pa. Gets Grant For Insect Study

A basic study of chemical compounds potentially useful for controlling pests through insect sterilization will be conducted under a \$24,892 grant awarded by the U.S. Department of Agriculture to the University of Pennsylvania.

The compounds to be studied are related to the chemosterilant tepa, which has been used extensively in research on chemically sterilizing the screw-worm fly, a destructive pest of livestock. ARS scientists will evaluate the biological activity of the compounds produced by the university study.

One of the problems in applying chemosterilants is that different insects are susceptible to different chemical agents. The Pennsylvania scientists will try to discover why this is so. Part of the study will be devoted to determining the relationship between the chemical structure and the potency of prospective sterilants.

Bethlehem, Agway Set Limestone Agreement

Bethlehem Steel Corporation recently announced that it has entered into an agreement with Agway, Inc., Syracuse, N.Y., to furnish the northeastern agricultural cooperative with an important byproduct of its quarrying operations.

Shipments to Agway of vari-

ous types of this byproduct—commonly known as agricultural limestone—are expected to increase over the next few years to about 200,000 tons annually, Bethlehem said.

The limestone product will be made available through Agway dealers in Delaware, Maryland, New Jersey, Pennsylvania and some areas of New York.

Three Bethlehem Steel quar-

ries are involved in the production and shipment of these high-grade agricultural liming materials. They are located at Hanover, Annville and King of Prussia, all in Pennsylvania.

Most of the agricultural material produced at these quarries results from making fluxing ingredients for the steel corporation's blast furnaces and open hearths located many miles away.

The agricultural liming materials will be furnished to Agway mostly in bulk for direct spreading to fields. Specifications will vary slightly between quarries but will fall well within the desirable limits recommended by state and federal authorities.

Lancaster Farming, Saturday, July 8, 1967—13

NFU Lauds Dairy Import Limits

National president of Farmers Union Tony T. Dechant said this week that "the action of President Johnson to invoke Section 22 to limit sharply dairy imports gives dairy farmers renewed hope for an improvement in prices and more net return."

Dechant, who met with President Johnson recently to discuss the dairy import problem said that "the President, in cutting imports to an annual level of 1.011 billion pounds of milk equivalent, has demonstrated his concern over the high cost of dairy production and has made clear his desire to help dairy farmers increase their return on mounting investment in herd and equipment."

While recognizing the President's action as an "important stopgap measure" Dechant said that "a more permanent solution than invoking Section 22 is urgently needed. Therefore, Farmers Union will continue to seek Congressional approval of the Dairy Import Act of 1967 introduced by Senator William Proxmire and which now has 57 Senators and 177 House sponsors."

"The U.S. Department of Agriculture has given important support in the action of the President," Dechant said, "and Secretary Freeman has given me his assurance that steps will be taken immediately to curb the four-billion pound annual level at which imports are running in 1967."

TEACH SPORTSMANSHIP

Parents who permit their child to always win at games are doing him a great disservice, reminds Mrs. Marguerite L. Duvall, Penn State extension specialist in child development. When a child loses, he can learn to accept failure by discovering that his parents still love him and still enjoy playing the game with him.

Feeders everywhere are talking about Ful-O-Pep *Cattle-izer* Beef Supplement

In feedlot after feedlot—commercial and farm—feeders are reporting better gains and conversions at lower feed cost.

The reason: It's Ful-O-Pep Cattle-izer Beef Supplement . . . designed to enable the beef animal to get up to 20% more energy from the same amount of feed . . . and to use that extra energy for faster, more efficient gains.

Gain, efficiency of gain, cost of gain, market value of cattle, and other factors are reflected in net return. And *net return*, cattlemen are reporting, is higher when Ful-O-Pep Cattle-izer Beef Supplement is fed.

Stop in and talk it over

Holsteins Recognized In York County Herds

Holstein cows in two York County herds were recognized recently for outstanding production records.

A registered Holstein cow owned by Sinking Springs Farms, Inc., has entered the select circle of national leaders on Dairy Herd Improvement Registry test.

Sinking Springs General Lily has completed the fifth highest official butterfat record made by a junior four-year-old milked twice daily in the 365-day division of the DHIR program.

Her official 365-day record totalled 28,455 pounds of milk and 1186 pounds of butterfat. Lily was bred in the herd of her present owner and is a daughter of the Gold Medal Sire Cochran General.

Topping this age group nationally in butterfat is Don Augur Marthas Queen Liz, whose record was completed while in the herd of Donald J. Augur, Northford, Connecticut. She is now owned by Mr. and Mrs. Herbert Royer, 2025 Oregon Pike. Milked twice daily, she produced 28,351 pounds of milk and 1298 pounds of butterfat in 352 days.

The other York County cow recognized was a registered Holstein owned by Avalong Farms, Inc. She completed a milk record exceeding 30,000 pounds, according to the Holstein-Friesian Association of America.

Classified Very Good, Mac-hold Imperial Fedora actually produced a total of 31,065 milk, and 1061 butterfat.

● Base Plan

(Continued from Page 1)

Thursday night at the Guernsey Sale Pavilion, Lancaster.

Gartley anticipates that ballots will be mailed out by the market administrator next week, with voting to be tabulated by approximately the 26th of July. If approved, the amendment will go into effect August 1st.

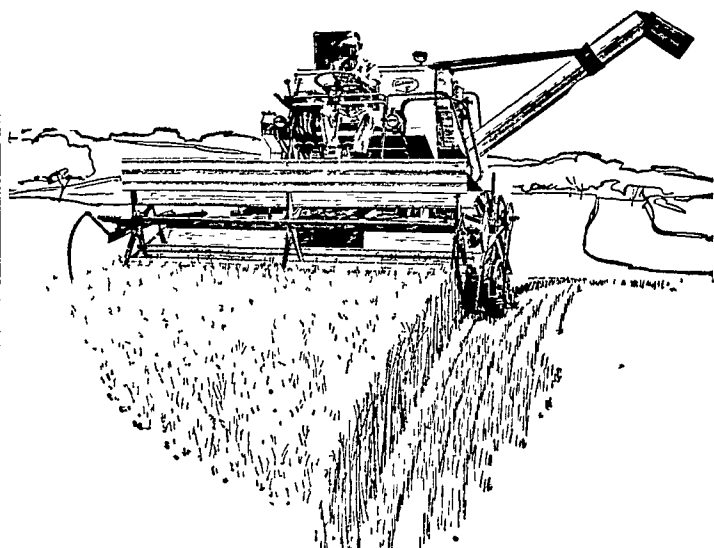

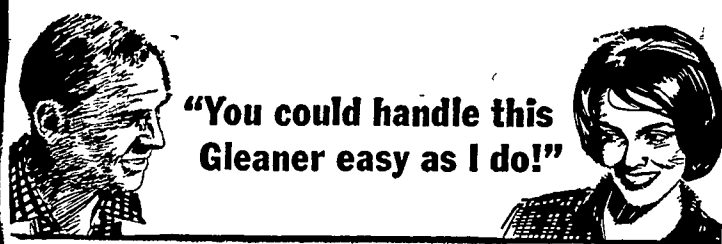

The idea of the base-excess plan is to level out production of milk, and dairymen's income, by easing the seasonal variations now existing. Normally, July through December would constitute the base period — consisting of a minimum of 154 days. But, to get the program going this year, the base will be established in the period August through December — 123 days.

Each farmer's base would reflect his average daily deliveries to the market in base-forming months. This would determine how much milk he could market in the normally-surplus months of March through June and receive a straight blend price. If he exceeds his base during the surplus period, he will be paid at the Class II price for the excess.

Each year thereafter, the dairyman would establish a new base during the July-December period. In case the base plan is defeated in the referendum, it will not affect the federal order number 4 which now covers dairy farmers in the Delaware Valley area.

MARKET EGG PRODUCERS

EFFICIENCY PAYS

DO YOU KNOW THAT:

- A 12½% reduction in feed required per dozen eggs equals a saving of approximately \$350.00 per 1000 hens.
- That our Early Bird All Mash Laying Feeds will definitely produce **BETTER SHELL QUALITY** over the laying year?
- That each ½% improvement in breakage can improve your income by \$36.00 per 1,000 hens housed?
- A price improvement thru **BETTER GRADE** of ½ cent per dozen amounts to approximately \$100.00 per 1,000 hens housed?
- If your feeding program gives you 1% better hen house liveability and ½ dozen more eggs per hen housed, it can mean as much as \$175.00 extra return per 1000 hens?
- That **GOOD** records pay big dividends? Without accurate records you **CAN NOT** fairly judge the value of your program?
- That it's not the **START**, it's the **FINISH** that counts.

May We Help You Do A Better Job?
